

Dragon Medical One

Capture the complete patient story naturally and efficiently

Cloud-based HITRUST CSF-certified clinical speech recognition platform for documenting care in the EHR and beyond.

Clinicians, not technology limitations, should dictate the patient story. With Nuance Dragon Medical One AI-powered speech recognition, clinicians use their voice to navigate screens, dictate content and pull EHR data directly into their notes. Whether conducting in-person and virtual consults, clinicians spend less time creating documentation—anytime, anywhere—in the EHR and beyond.

Freedom and flexibility to document your way

Nuance Medical Speech Recognition solutions are designed to accurately translate the physician's voice into a rich, detailed narrative that feeds directly and seamlessly into all major EHR platforms. These solutions offer the freedom and flexibility to complete patient notes at their convenience and dramatically reduce the amount of time spent on documentation.

High-quality dictation microphone with mouse functions Boost clinician productivity with Nuance PowerMic III ergonomic control of dictation functions and on-screen field navigation.

Flush, angled microphone element offers optimal user comfort and recording level/signal

Dictate button turns the microphone on and off

"Track-point" controls the cursor to navigate screens and select functions

Transcribe button transfers text from the dictation box to the cursor location or toggles display of the dictation box

Tab-forward/tab-backward buttons speed navigation through on-screen fields

Dragon Medical One is all about portability, personalization, access, and compatibility

Single voice profile

Designed for speed, accuracy, and flexibility, Dragon Medical One achieves 99% accuracy from the start with no voice profile training. Cloud-based clinical speech recognition and a single voice profile deliver personalized vocabularies and templates for a familiar, consistent experience across clinical workflows, care settings, apps, and the widest range of devices in the industry.

Portable convenience

PowerMic Mobile turns any workstation into a dictation station and gives clinicians the freedom to document notes using their smartphone as a secure wireless microphone.

Built-in productivity tools

Voice commands limit manual clicking by automating key presses, turning the microphone on and off, and inserting documentation templates or frequently-used text content.

Integrated CAPD

Nuance comprehensive in-workflow CAPD engages physicians at the point of care with a proven methodology for clinical indicators, risk factors, and treatment. Dragon Medical One provides access to its inpatient, outpatient, and specialty care content libraries to help clinicians improve efficiency, avoid rework, and ensure documentation supports appropriate reimbursement and quality.
